**Subject:** RE: Staff Transmittal

Katherine,

We currently service shoe shell drive on Township street but Township will increase in traffic in the next few years. Our trucks have already been hit at least twice over the years, while servicing carts on township. So I would request they build a turnaround at the end by lot 3, so our trucks can drive down and turn around, this is so we can service shoe shell drive lots safely, it would need to accommodate our trucks. At the same time the road would need to be wider than it is now and improved to accommodate our trucks, pavement is preferred. The road will need to be maintained, it is heavily wooded.

Leo
